

LOADING SYSTEM AND METHOD OF USE

ABSTRACT OF THE DISCLOSURE

5 A system and method for loading product onto a conveyor. The
system includes a conveyor movable in at least a first direction and a
metering section located proximate to at an end of the conveyor. The
metering section includes a plate mechanism movable between a first
position and a second position and a door adapted to be opened to a feeder.
10 The door is at least partially supporting a predetermined amount of product
and is positioned between a movable distance of the plate.
